Main Interests

My programming adventure started a year ago. Currently, I mainly develop my skills in Java 11, Spring and Angular. I also have some experience in Python, Flask, JavaScript and PostgreSQL. I am open to learn new technologies.

Peer Recommendations

"Kasia is a highly motivated and driven person. She commits herself to every project she's involved in and doesn't give up when problems arrive. Kasia creates a great work atmosphere, and it's always a pleasure to work with her. I think she'd be a great asset to every team."

– Vitalij Kokhanau

"Katarzyna is quite an independent programmer who relies mostly on herself to solve her problems. Not afraid to ask for help, but she'll first try and finish the task herself. She works well within groups, other people like working with her, because she is a fun person to be around and can contribute to any task at hand."

– Adam Panasiuk, mentor

Strengths

Hard skills
- Java SE
- Spring
- Angular
- JavaScript
- PostgreSQL
- Python

Soft skills
- Hardworking
- Relentless
- Personal Development
- Dependable
- Team player
- Diligent
- Likes to learn

Recent Projects

▶ Portfolio
HomePage: http://sikorakatarzyna.pl/
Front-End: https://github.com/Kasia-Sikora/Web-CV
The project was created in order to deepen knowledge in CSS, HTML and Angular.
The main assumption was to create a CV page that would contain all the necessary information about me. I think this is a more convenient and enjoyable way to view a resume than raw PDF.

▶ FoodStuff
HomePage: http://foodstuff.sikorakatarzyna.pl/
Front-End: https://github.com/Kasia-Sikora/ShoppingListDemo-UI
Back-End: https://github.com/Kasia-Sikora/ShoppingListDemo
Web app for recipes management and meal planning that allows users to collect recipes in one place and create a shopping list. Application built to practice Spring and Angular

▶ Memory Game
GitHub: https://github.com/Kasia-Sikora/MemoryGame
Memory game is a card game in which all of the cards are laid face down on a surface and two cards are flipped face up over each turn. The object of the game is to turn over pairs of matching cards. It's a game built for practice web application, using HTML, CSS, JavaScript and Python(Flask).

▶ API WARS
GitHub: https://github.com/Kasia-Sikora/API-WARS
API Wars is web application which shows data about the Star Wars universe, store visitor preferences with cookies and handle user login with sessions. It's a page to practice creating simple web applications using HTML, CSS, JavaScript and Python(Flask).

Education
